COUNTY OF HANCOCK STATE OF MISSISSIPPI PUBLIC NOTICE

There came on for consideration the matter of unauthorized dumping of garbage, debris and other trash on certain public roads in the county, and the Board having considered the matter does now find and determine that such practices are unsightly, create a nuisance and are costly to the taxpayers and should be stopped.

The Board further finds that it has previously set aside certain lands in the rear of Jackson Ridge as a public dumping ground and that since ample space has been provided for such purposes that the practice of dumping garbage and trash on public roads should be stopped.

The Board further finds that it has never given permission to anyone to use the public roads of the county for a dumping ground and that the prohibition and penalties of Section 2214-5 of the Mississippi Code 1942 should be invoked and enforced.

Whereupon Supervisor Frierson

moved that all law enforcement officers of the County be requested to henceforth enforce the provisions of Section 2214-5 of the Mississippi Code of 1942, and,

Further that the Clerk of this Board be authorized and directed to set forth the penalties prescribed by law for the violation of said Section in the following words and figures, to-wit:

It shall be unlawful to dump, or otherwise place or deposit waste, garbage, debris or other materials or substances generally classed as trash, within the boundaries of any public road of this state, except when permitted by the Board of Supervisors of any County within which such road lies, and the board shall have authority to permit such dumping on roads other than Mississippi or United States Highways.

Any person who violates this act shall, upon conviction, be fined not less than five (\$5.00) Dollars nor more than twenty-five (\$25.00) Dollars for each offense.

The motion for the adoption of the foregoing order was duly seconded by Supervisor Russ and unanimously adopted.

GIVEN under my hand and official seal of office, this the 18th day of July, A. D. 1960.

Four Leading Causes Of "Open Highway" Traffic Accidents

The four leading causes of "open highway" traffic accidents last month were listed by the Highway Patrol as following too close, failure to yield right-of-way, improper passing and improper turning.

Chief of Patrol Dave Dayden indicated that the Highway Patrol will be concentrating on these four violations during August, when the present crackdown on lighting equipment and driver's licenses ends.

He said patrolmen will be instructed by their inspectors to concentrate on clear-cut violations, but that flagrant offenders would be arrested. He indicated that he felt too little emphasis had been placed on these hazardous violations in the past.

Monthly activity reports from the time Highway Patrol districts for June list causes of district accidents, as well as give breakdowns of enforcement activities. The June reports of practically every Patrol district showed following too closely, failed to yield, improper passing, and improper turning to be the leading causes of area accidents.

"Yet these are violations which are most often ignored until after an accident," Chief Gayden observed.

He added that during the coming crackdown on these violations some Patrolmen may be instructed to concentrate on the "Hazardous Four" exclusively.

Mr. and Mrs. William Ogden have as their guests their son and family Dr. and Mrs. W. W. Ogden and children Deborah, Beverly and Jeannette and Charlotte, Charles Ogden, all of New Orleans.

They were installed at the Legion Home Thursday night.

Mrs. Gilbert Guyaut, retiring president welcomed the guests and members and expressed her appreciation to the officers, members and Legionnaires for their splendid cooperation during the past year.

Mrs. Russell Elliott, a past president of the local unit, was installed officer.

Conservation School
Held At Roosevelt
August 1 to 5th.

Jack Stuart of Meriton School of the Boys Conservation Committee announced that the annual Conservation School will be held at State Park August 1 to 5th.

That 175 boys from counties are expected to be in three phases of conservation, forestry, soils and water.

Stuart on the state level are Jack Holman, chairman; Jack Cooper, Wayne Burrage, Louis Metterville, Columbia; A. P. Fothergill, C. B. Pittman; C. B. Anderson, J. S. Newcomb, all of W. S. Busick; R. O. Haney, E. Farris, all of Morristown; S. Shaw, State College; E. F. Cleveland; B. F. Honeyville and C. D. Lowe.

boy attending Boys Conservation School is selected by a committee composed of the Agent, Area Forester, Agriculture Teacher and Warden.

Some of the factors when the selection of a boy is made are his interest in his work and his progress.

The conservation program
will be a three-day course
for boys from the county.

Individual and some group projects will be assigned. The course covers transportation, meals and lodging. Stuart said that, although the Boys Conservation School deals primarily with instruction on the various phases of conservation, a great deal of emphasis is placed on spiritual and social training.

Recreational periods are included in the curriculum during which boys may participate in various recreational activities including swimming, softball, volleyball, horse shoes and others.

SOUND FORESTRY DEVELOPMENT
KEY TO MORE
PROSPEROUS FUTURE

Mississippians are becoming increasingly aware that forestry is a major phase of our economy, contributing more than \$350 million each year to our state's progress, prosperity. Leadership has adopted the long-range goal of making forestry a billion-dollar industry, and this objective is entirely practical. Mississippians need to employ only the simplest arithmetic to figure the pace at which trees must be planted, grown and harvested to keep abreast of the expanding needs of regional and national economy. Sound forestry development is one of the most profitable investments Mississippi can make.

Leo C. Ladner Named
On FHA Committee
By Max Stone

Appointment of Leo C. Ladner, RFD No. 1, Bay St. Louis, Miss., as a member of the Farmers Home Administration county committee was announced this week by Max H. Stone, the agency's county supervisor, serving Hancock County.

Mr. Ladner operates a general type farm for his Aunt and also farms with his father. He is a veteran and is married and has four children.

Two other members make up the 3-member committee which works with the county supervisor to see that the best possible use is made of the agency's farm credit program consistent with local farmers' needs.

Two other members are Horatio Harrel and Willie Ladner of R. 2, Perkinston, Miss. Mr. Harrel will serve as committee chairman during the next or 1961, fiscal year.

Each member is appointed for a 3-year term. Mr. Leo Ladner succeeds Russell Chapman whose 3-year term expired this year.

The committee determines the eligibility of individual applications for all types of loans. It also reviews borrowers' progress and aids the county supervisor in adapting the agency's loan policies to conditions faced by farmers in this area.

Members are selected and appointed so that, so far as possible, different areas or neighborhoods are represented.

The Farmers Home Administration
term loans to farmers who need
adequate funds to buy equipment
and livestock, and longer term
loans to build or repair houses
and other essential farm buildings
and to purchase or improve land
suitable for family-type farm
operations.

It also advances credit to farmers or their non-profit associations to establish and carry out approved soil and water conservation practices and to install and improve irrigation and farmstead water facilities.

Mississippi Municipal Assn. Intervenes In Suits Before Public Service

Mayor James L. Ballard of Tupelo, President of the Mississippi Municipal Association, stated that the association intervened in the suits now pending before the Mississippi Public Service Commission between the Delta Electric Power Assn. and the Capital Electric Power Association vs. Mississippi Power and Light Company because it felt that the rights of a city to grant a franchise were definitely involved in these suits. He further stated that the right of franchise was a home rule principle that the municipalities could not afford to lose.

This petition to intervene was approved by a regular meeting of the MMA Executive Committee on June 10th at its annual convention in Biloxi and was passed by the some fifty members of the Executive committee who were present without a dissenting vote.

Mayor Ballard also pointed out that it was not the intention of the Mississippi Municipal Association to be for or against the parties involved in these two suits but that the right to determine who should serve the citizens of a municipality must remain with municipal officials and the citizens of the various municipalities in order to retain local self government.

Talent To Take Spotlight In Miss Mississippi Pageant
Vicksburg—Talent will take the spotlight at the Miss Mississippi Pageant this year in accordance with a new point system prescribed for Miss America preliminary contests.

The judges' points in talent competition have been raised to twice the number awarded in evening gown and swim suit competition, said Jack Ramsey, director of the Miss Mississippi Pageant for the Vicksburg Jaycees.

Miss Lenora S. Slaughter, executive director of the Miss America Pageant, told Ramsey that "this is due to the tremendous number of talent scholarships now being awarded at local and state contests as well as at the national contest. She added that if a contestant does not possess the necessary talent the chance of winning one of the scholarships "are negligible." In Mississippi, the Miss Mississippi Pepsi-Cola bottlers association is awarding \$2,000 in scholarships, with the winner of the state title receiving \$1,000 and each of the other finalists, a \$250 scholarship.

The Miss Mississippi contest will be conducted in exactly the same manner as the finals for the Miss America Pageant, to be held in Atlantic City, September 6. 10. Miss Slaughter explained that contestants are judged separately in the evening dress, swim suit, and talent divisions, with each judge voting independently, giving points to the girls he personally

number of points will be named winner of the contest. The finalist with the second highest point total will be named first runner-up, etc.

The judges who will serve at the Miss Mississippi Pageant are recognized experts in evaluating contestants as state representatives for the Miss America Pageant. This year, the judges are: Mrs. Betty Yawn of Ruston, La.; A. F. Thomas of Forrest City, Ark.; Mrs. Dorothy Allen of Brinkley, Ark.; Sly Lange of Baton Rouge, La.; and Bill Muncie of Hot Springs, Ark.

Not a single cracked egg since Chevy took over the route

That '60 Fleetside pickup you see takes whatever kind of road comes along, and makes about 250 stops a day delivering eggs house to house for Mr. Harry Hansen of Missoula, Montana. "With my previous truck," Mr. Hansen writes, "I always had some cracked eggs. Cargo damage always cut into my profits. But the new Chevy eliminated that problem completely. I haven't had one cracked egg with my new truck and I've had up to a ton of eggs in it without any difficulty. . . I didn't know a truck could ride so nice."

Chevy rides nice, all right: takes good care of fragile cargoes. But that's not even the half of it. Torsion-spring suspension also means longer life for the truck, extra thousands of working miles, because the sheet metal and body components take less of a beating. You can run off-the-road or over back trails at faster safe speeds, too; get in more trips a day, make more money. Those facts are as true of the big Chevrolet heavyweights as they are of the pickups. Any model you name. Get one on your job and you've got the world's most efficient, most economical way to haul any load over any road. Your dealer will be happy to prove that statement any day you say.

"I'm getting close to 20 miles to the gallon," Mr. Hansen notes, "and that's on slow and go delivery."

"our GAS air-conditioning is Simply the COOLEST"

Young Miss Priss may never figure out how a gas flame can produce cool air, but she knows the end result — and loves it! Dad loves it, too . . . especially the low operating and maintenance costs. Central GAS air conditioning actually pays for itself in a few years — in lower utility bills and very minor upkeep expense. Mother really appreciates gas air conditioning more than anyone else in the family, because she lives with it more hours every day. She likes it because it's so quiet . . . so perfectly the perfect air conditioner. Whether you're looking for maintenance-free, trouble-free, economical GAS air conditioning, ask your local dealer, or write for literature to the nearest equipment dealer or the gas company.
